

Canvas Computer Requirements

Coconino Community College uses a Learning Management System (LMS) called Canvas. To use Canvas effectively, it is important that your computer meets certain requirements.

Basic Computer Requirements

It is recommended to use the most up-to-date versions of your operating system and at least a cable or DSL internet connection. Canvas will still run with the minimum specifications, but you may experience slower loading times or other issues.

Refer to the official Instructure guide on [Basic Computer Requirements](#) for computer specifications.

Browser Requirements

It is recommended to update to the newest version of whatever browser you are using as well as the most up-to-date Flash plug-in.

Refer to the official Instructure guide on [Browser Requirements](#) for more information.

CCC recommends Chrome or Firefox because they work best with the features Canvas has to offer:

- [Download Chrome](#)
- [Download Firefox](#)

Flash is required for media streaming/recording

- [Flash plug-in](#)

Java is required for screen sharing in conferences.

- [Java plug-in](#)
