

Policy 211-00 Tuition Adjustments

Sponsor: Business and Administrative Services

Policy

The District Governing Board recognizes that stability and predictability in tuition rates are essential to maintaining affordability and supporting student enrollment. Research across community colleges, as well as institutional experience at Coconino Community College, has shown that implementing a single, substantial tuition increase — particularly after multiple years without adjustment — can negatively affect student enrollment.

This policy establishes a structured, index-based approach, based on the Higher Education Price Index (HEPI), to tuition adjustments that align with inflationary trends while ensuring access and affordability for students.
