

CCC ALERT

Coconino Community Colleges Emergency Notification System.

CCC ALERT revolutionizes campus safety by transforming the cell phone that almost every student, faculty or employee member carries into a personal safety device.

Our goal is to ensure that all members of the Coconino Community College community feel as safe and secure as possible. However, it is essential for you to take the first step. [Enroll in CCC ALERT](#) to help us notify you in case there is an emergency. Alerts will be sent via text message to your cell phone.

When you complete your Vehicle Registration Parking form, write your cell phone number on the bottom of the form. That number will be used for the emergency text messaging.

If you are interested in signing up for this free service, but do not drive to campus, you can learn how to sign up online by accessing [Securitys help](#) file.

Remember, this service is totally voluntary but highly recommended and will only be used to notify you of an event of imminent danger or of an extreme safety concern on or around the Coconino Community College Campus.

CCC ALERT will be tested on a periodic basis using text messages clearly marked as test messages. Phone numbers given to Security on the Vehicle Registration form will not be given out or used for any purpose other than the CCC ALERT.
