

English & Math Placement at CCC

For students who have completed two or more years of high school and are within five years of their high school graduation, cumulative (unweighted) high school GPA is the primary measure of English preparedness. For all other students, test scores are the primary placement measure. For all students, the highest score determines placement (anyone can test to get into a higher course). Boxes that are grayed out indicate that this measure is not available for placement into the corresponding course.

English & Math Placement at CCC

For students who have completed three or more years of high school and are within five years of their high school graduation, cumulative (unweighted) high school GPA is the primary measure of Math preparedness. Students who have completed less than three years of high school can use their grade in Algebra 2 for placement. For all other students, test scores are the primary placement measure. For all students, the highest score determines placement (anyone can test to get into a higher course). Boxes that are grayed out indicate that this measure is not available for placement into the corresponding course.
